INFORMATION FOR AUTHORS

Dimtcho Zahariev and Zheni Dimitrova are teachers of Botany at the University of Shumen, Bulgaria

Mariya Kaschieva is a teacher of Plant Physiology at the University of Shumen, Bulgaria

Petya Boicheva is a curator of the plant collections and herbarium at the University botanical garden - Ecopark Varna at the University of Sofia, Bulgaria

Lidiya Taneva is a student in a master's program "Management and conservation of the ecosystems" at the University of Shumen, Bulgaria

**The book has been prepared and issued within the project
"Study of biodiversity in natural and artificial ecosystems.
Monitoring and management of the populations of
economically important species and strategies for
the sustainable development of the ecosystems"
at the University of Shumen, Bulgaria
No RD-08-271/11.03.2015**

FOREWORD

In Bulgaria, there are 845 plants (wild and introduced) that are naturally disseminated and used by the traditional or the folk medicine. This number accounts for almost 21% of all 4102 vascular plants found to date on the territory of the country. In other words, every fifth plant in Bulgaria is considered medicinal. Our study shows that in regions of lower altitude, this percentage is significantly higher and, often, every second plant in those areas is medicinal. *The Album of Medicinal Plants in Bulgaria* includes 500 species: more than a half of the abundance of medicinal plants. Our goal is that this album will serve the needs of students of Botany and Pharmacy. Furthermore, the album may benefit Biology instructors as well as all those who grow, collect, or process medicinal plants. The names of plant species, genera, and families are presented according to the contemporary botanical nomenclature.

FOREWORD

In the album, the plants are grouped according to their biological type: trees, shrubs, perennial, biannual, and annual herbaceous plants. Some plants may be placed into two groups: for instance those that under specific circumstances develop as shrubs, but in other conditions develop as trees. In every group, the plants are organized in alphabetic order following their scientific Latin name. In our opinion, this approach provides the easiest access to species for specialists and anyone interested in medicinal plants. At the end of the album, we have included two important lists in order to encourage preservation of the medicinal plants' natural habitats in Bulgaria: 1. The first list consists of medicinal plants (included in this album) under prohibition for collection in their natural habitats; 2. The second list consists of medicinal plants (included in this album) whose collection in their natural habitats is restricted.

LIST OF MEDICINAL PLANTS (INCLUDED IN THIS ALBUM) UNDER PROHIBITION FOR COLLECTION IN THEIR NATURAL HABITATS

1. *Adonis vernalis* L. (Ranunculaceae)
2. *Angelica pancicii* Vandas (Apiaceae)
3. *Arctostaphylos uva-ursi* (L.) Spreng (Ericaceae)
4. *Asarum europaeum* L. (Aristolochiaceae)
5. *Asplenium trichomanes* L. (Aspleniaceae)
6. *Convallaria majalis* L. (Asparagaceae)
7. *Glaucium flavum* Crantz (Papaveraceae)
8. *Helichrysum arenarium* (L.) Moench (Asteraceae)
9. *Hyssopus officinalis* L. (Lamiaceae)
10. *Inula helenium* L. (Asteraceae)
11. *Lycopodium clavatum* L. (Lycopodiaceae)
12. *Orchis mascula* L. s. str. (Orchidaceae)
13. *Orchis morio* L. (Orchidaceae)
14. *Orchis purpurea* Huds. (Orchidaceae)
15. *Orchis simia* Lam. (Orchidaceae)
16. *Orchis tridentata* Scop. (Orchidaceae)
17. *Phyllitis scolopendrium* (L.) Newman (Aspleniaceae)
18. *Ruscus aculeatus* L. (Asparagaceae)
19. *Valeriana officinalis* L. (Caprifoliaceae)

LIST OF MEDICINAL PLANTS (INCLUDED IN THIS ALBUM) UNDER RESTRICTION FOR COLLECTION IN THEIR NATURAL HABITATS

1. *Alchemilla indivisa* (Buser) Rothm. (Rosaceae)
2. *Artemisia alba* L. (Asteraceae)
3. *Atropa bella-donna* L. (Solanaceae)
4. *Berberis vulgaris* L. (Berberidaceae)
5. *Betonica officinalis* L. (Lamiaceae)
6. *Carlina acanthifolia* All. (Asteraceae)
7. *Galium odoratum* (L.) Scop. (Rubiaceae)
8. *Paeonia peregrina* Mill. (Paeoniaceae)
9. *Primula veris* L. (Primulaceae)
10. *Sedum acre* L. (Ceassulaceae)
